Risk ID	Risk Category	Risk Description	Risk Rating	Risk Score	Status	Treatment
RISK-016	Incident Management	A phishing-related email account compromise occurred 3 months ago and was contained within 4 hours, but no formal Incident Response Plan exists at NorthLink. Response was improvised by IT Manager. No root cause analysis, incident report, or lessons-learned review was conducted following the event.	Critical	20	Open	Mitigate
RISK-009	Cloud Misconfiguration	AWS S3 buckets used for log archival are publicly accessible due to misconfigured bucket policies.	Medium	8	Open	Mitigate
RISK-014	Third-Party Risk / Supplier Risk	Cloud Payroll vendor PayFlow Pro stores employees SIN numbers,salary details, and banking information in plain text. NorthLink has no visibility into vendor security controls, no SOC2 report on file, and vendor contract contains no security requirements clause.	Critical	25	Open	Mitigate
RISK-004	Data Breach / Privacy	Customer PII and billing data stored in on-premise database with no encryption at rest and minimal access controls.	Critical	15	Open	Mitigate
RISK-015	Operations	Enterprise VPN solution used by 45 remote employees including NOC engineers contains a critical unpatched vulnerability with a publicly available exploit (CVE	Critical	25	Open	Mitigate
